

## The new, mightier mini.

### Intel Core 2 Duo processor

Introducing the new Mac mini. Just connect this tiny 6.5-inch-square Mac to your own display, keyboard, and mouse and you've got an instant desktop computer loaded with Mac OS X Snow Leopard and iPhoto, iMovie, and GarageBand. The new Mac mini features a faster processor—up to 2.53GHz—and up to 4GB of memory. That's twice as much memory as before. It also comes with up to 320GB of storage space and high-performance NVIDIA graphics. What doesn't Mac mini do? It doesn't waste energy. Mac mini uses less than 14 watts of power when idle, making it the world's most energy-efficient desktop computer. Starting at \$649.

### Features

- 2.26GHz or 2.53GHz Intel Core 2 Duo processor
