

Introducing the all new MacBook Pro family.

Redesigned. Reengineered. Re-everythinged.

With its breakthrough unibody enclosure, industry-first features, and environmentally sound design, it's a revolution in the way notebooks are made.

Multi-Touch trackpad

Now the entire trackpad is also the button, so it's clickable everywhere. And it offers even more Multi-Touch gestures and functionality.

LED-backlit displays

The new MacBook Pro features an ultrathin LED-backlit display that is uniformly bright and brilliant from the moment you turn it on. It's completely arsenic- and mercury-free and more power efficient than ever.

Advanced NVIDIA graphics processors

Get the most out of graphics-intensive applications like Aperture and Motion. The MacBook Pro features both the NVIDIA 9400M integrated graphics processor and a high-performance NVIDIA 9600M GT discrete graphics processor.

Breakthrough battery performance.

Every new MacBook Pro features an advanced built-in battery that lasts up to 7 hours (8 hours on the 17-inch model) on a single charge.

Designed for life on the road

Innovations such as the MagSafe power connection and an illuminated keyboard with ambient light sensor put the MacBook Pro in a class by itself.
